

Both innovative and fun, the WordLock texting lock has a three-letter password which is super easy to remember – and it's all in texting language we all know and love (LOL, FBI, OMG). Forget those long numerical codes!

The design of the lock is very nice and the preset password was super easy to remember. Just don't tell anyone the password is text lingo and they'll never be able to crack the code.

WordLock Text Locks are now available at several retailers nationwide including Walgreens, Walmart, Office Max, ACE Hardware and Dick's Sporting Goods and online at [WordLock.com](http://WordLock.com) and [Amazon.com](http://Amazon.com).
