

# Can you spell **E-A-S-Y**?

We here at *azTeen* generally tend to be word people, not numbers people. So you can imagine how thrilled we were to receive **Wordlocks** in our daily delivery of cool stuff.

Wordlocks allow you to set your combination to a four- or five-letter word rather than a number combination, an idea that's so simple we can't understand why no one thought of it before now. One caveat: If your first inclination is to try to spell dirty words, you're out of luck. The letter wheel on a Wordlock doesn't contain every letter in the alphabet, so some combinations aren't available. But once you get your mind out of the gutter, you'll appreciate how easy these make your life. Available in four colors. \$9.99 to \$19.99 at Amazon.com, Ace Hardware and Target.
